

RED ENERGY

The huge Altamont windfarm, in California, kills 116 golden eagles yearly, on average

The much smaller Smola windfarm, in Norway, has killed 9 sea eagles in 10 months

Details, and many more examples here: <http://mark-duchamp.spaces.live.com>

500 windfarms will wipe out the Scottish Eagles

The **RSPB**, fighting against the Lewis project, is not doing enough:

TOKENISM won't save the red kites, the eagles, and the wild lands

Windfarm developers are using the **RSPB** as moral support

PLEASE sign our petition & contribute to our fund to save the birds and the Scottish wild lands: <http://mark-duchamp.spaces.live.com>
